

Consent to Naturopathic Treatment

Naturopathic medicine uses natural approaches to treat and prevent disease. Naturopaths take into account the unique complexity of a person's circumstances, including physical, mental, emotional, genetic, environmental and spiritual factors. Therapeutic procedures include diet and lifestyle counselling, nutritional supplementation, herbal medicine, homeopathy, aromatherapy, bach and bush flower essences. During your first Skype consultation Naturopath Gabi Giacomini will take a thorough medical history and recommend supplements and laboratory testing.

While the chances of experiencing complications from supplements are minimal, it is the practice of this clinic to inform our patients about them. These complications may include, but are not limited to:

- Temporary worsening of symptoms

More serious complications are extremely rare.

I have read and understand the above statements regarding potential treatment side effects and understand that there may be potential risks or side effects that Gabi Giacomini cannot anticipate. I also understand that there is no guarantee for a specific cure result. I understand that at any time I may withdraw consent to any further treatment. All enquiries: admin@theconsciouspod.com.

Patient Name _____ Guardian Signature _____

Clinic Policies

All personal and medical information, including pathology tests are kept by Gabi Giacomini at The Conscious Pod. Your information is not released without written consent provided by you unless required by law. All patient information is kept private and confidential.

I consent to discussing my child's case through email if necessary: Yes No

Welcome!

Thank you for taking the time to fill out this extensive questionnaire. Your time and care is appreciated.

Consent to Audio-Visual Communication

Online audio-visual consultations are an alternative to face-to-face consultations. There are situations where an online audio-visual consultation will enable more convenient and accessible healthcare delivery without compromising patient safety.

Benefits of audio-visual communication

- greater accessibility to specialist practitioner
- patient remains in the comfort of their home
- reduced financial burden for patient
- quick access to natural medicine care
- tests can be obtained from other locations

Risks of audio-visual communication Risks are rare, but the potential for problems during audio-visual communication must be examined:

- quality of image resolution and voice transmission may be poor
- internet connection or equipment may fail leading to delays or interruptions to consultations
- security efforts may be breached and confidential information leaked
- email communication may be lost or unopened

I, the patient, give consent to the following procedures and policy:

1. Information will be collected during Skype consultations and may be used to create a plan of treatment, referral for therapy, recommendation of supplements, education and future appointments. It can include: disclosure of pathology test results, medical images and records and includes audio and video streaming.
2. All efforts will be made to protect patient privacy and no recording of the consultation will occur without the patients prior consent. Patients are not authorised to make recordings of the online audio-video consultation.
3. Appropriateness of audio-visual consulting will be determined by the practitioner prior to the first consultation and subsequent consultations. Internet security software and adequate internet activity is used to secure patient confidentiality.
4. The only parties present during the audio-visual consultation will be the patient, any support person and the practitioner. A parent/ guardian must be present during the entire consultation if it involves a person under 18 years of age.
5. Patients may decline participation in the online audio-visual consultation at any time. If the patient wishes to decline participation in the audio-visual consultation fees still apply. In the unlikely event that the internet isn't working, telephone consultation will be used.

Patient Name _____ Date of Birth _____

Guardian Signature _____ Relationship to Patient _____ Date _____
